How do I connect my Android device to Eduroam?

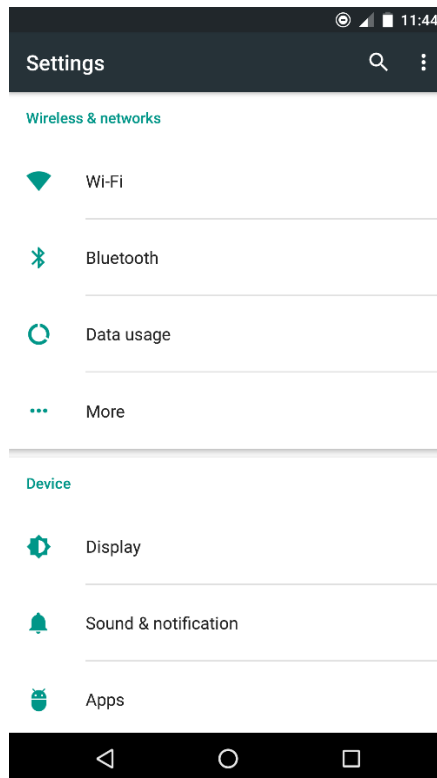

The following instructions apply to using Eduroam wireless service on Android Devices.

This may not work for all Android phones or versions of Android. Screens may differ between devices. If you need further support, please contact IThelp@tees.ac.uk or visit one of the IT Service Desks.

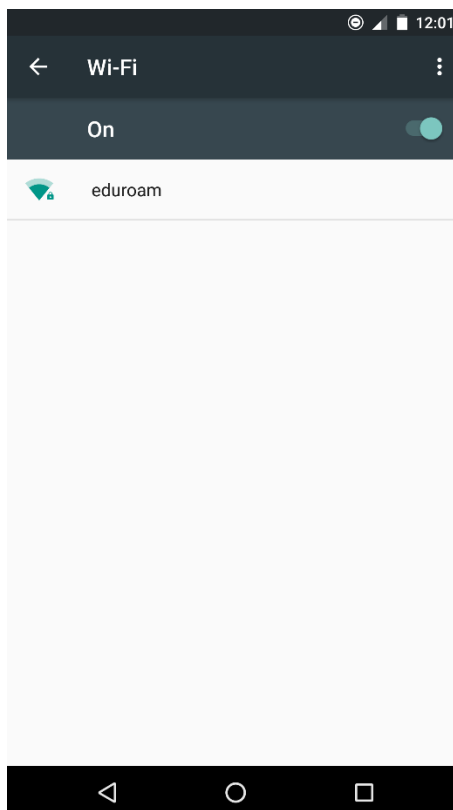

1. On your device's menu tap the settings icon. On most Android Devices it appears as a cog.

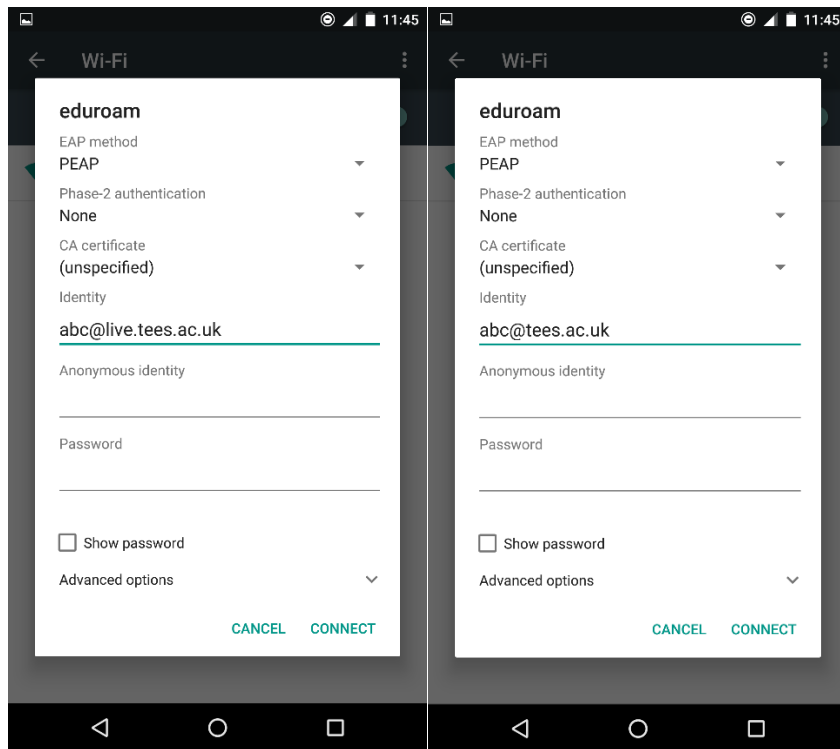

2. Tap Wi-Fi

3. Tap Wi-Fi to turn on and tap on Eduroam

4. Ensure EAP method is set to PEAP. Input your staff/student email address in the identity box. (Note that student emails end in @live.tees.ac.uk and staff emails end in @tees.ac.uk)

5. Enter the password you'd normally use to access our PCs in the password box, then click connect.

Wi-Fi

On
