

How do I change my default media player?

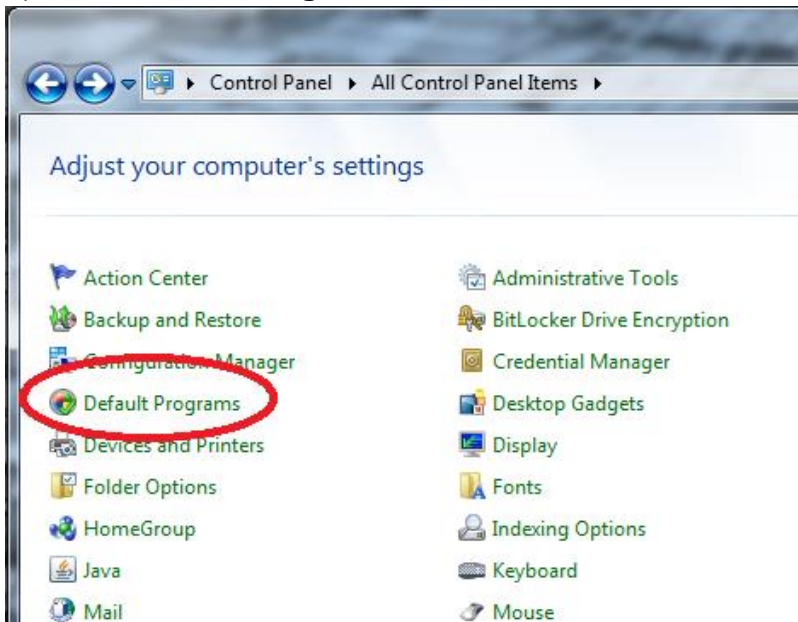

This guide will explain how to change your default program for playing media files such as .mp3 files and DVD's. Please Note: In order for the following FAQ to work you will need to have admin rights on your PC. In this example we will be changing your default to Windows Media Player.

1) Click Start, and Control Panel.

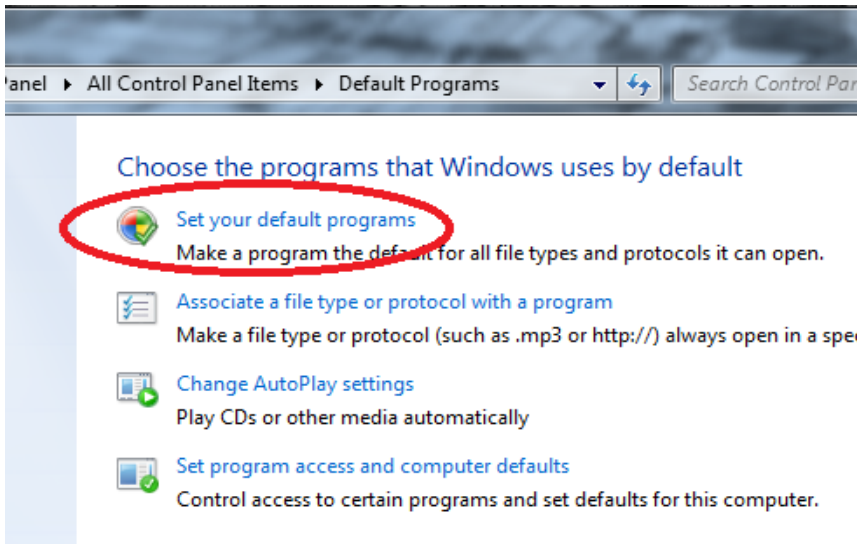

2) In Control Panel, under Category, click **'Small icons'** as highlighted below:

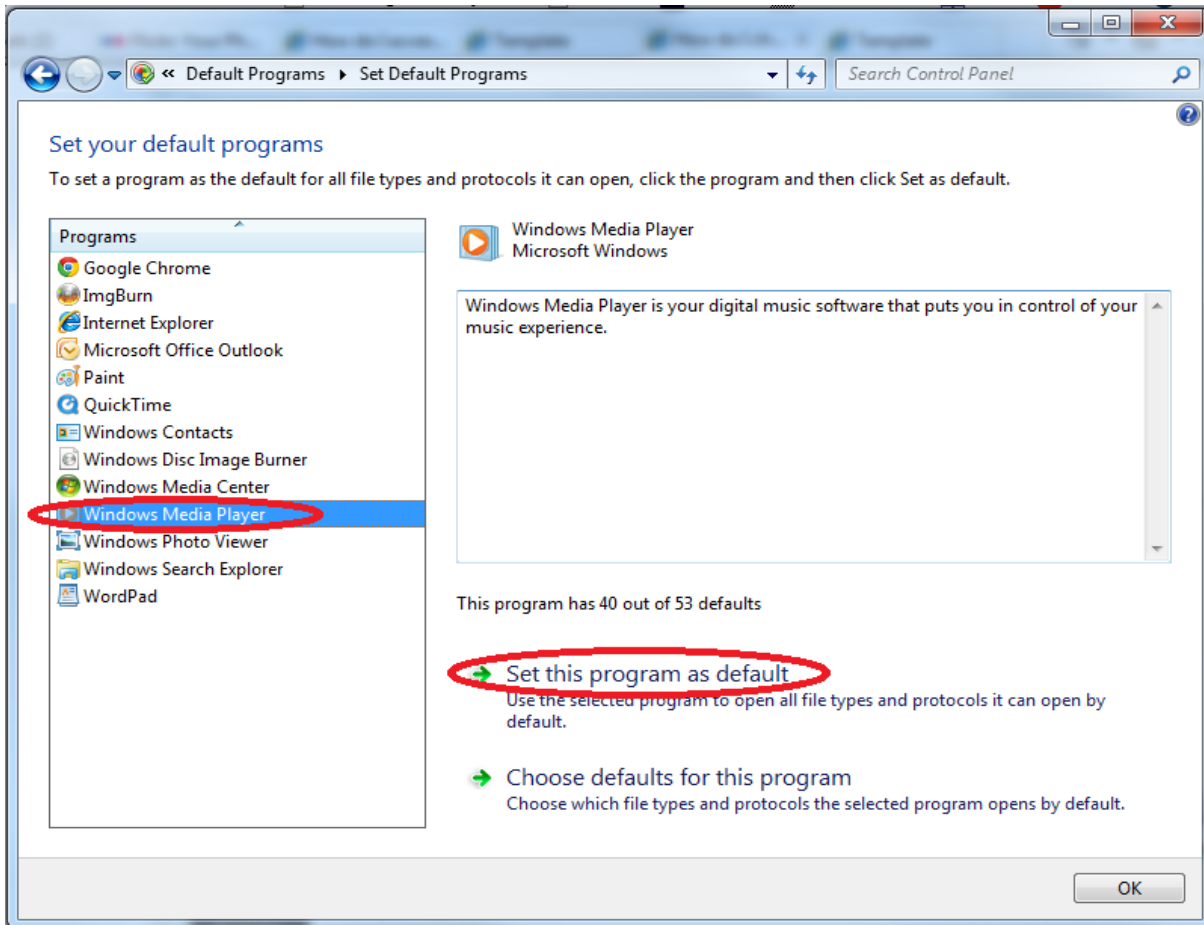

3) Click **'Default Programs'**:

and then **'Set Your Default Programs'**:

4) From the list on the left select your desired default media player (in this case Windows Media Player). Now click **'Set This Program As Default'**:

5) Click **'OK'**.
