

How do I open PDF files which will not open Internet Explorer?

Open Internet Explorer, and choose Tools > Manage Add-ons.

Under Add-on Types, select Toolbars And Extensions.

In the Show menu, select All Add-ons.

Select All Add-ons from the Show menu in the Manage Add-ons dialog box.

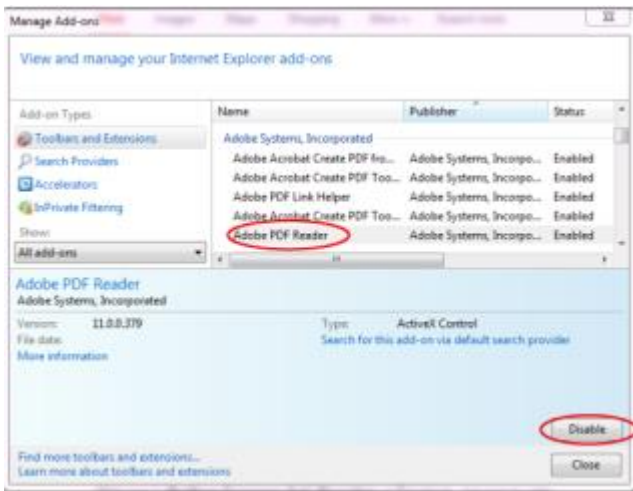

In the list of add-ons, select Adobe PDF Reader.

Note: If you do not see the Adobe PDF Reader add-on, try the other options on the menu. For example, on some systems, the add-on appears when you select Run Without Permission.

Click the Enable or Disable button (it toggles depending on the status of the selected add-on):

Enable sets the Adobe PDF Reader add-on to open PDFs in the browser.

Disable turns off the add-on so it does not open PDFs in the browser.

Select Adobe PDF Reader, and click the Enable/Disable button.
