

## Tips for using touch enabled projectors and the new touch screens coming soon

### Control PowerPoint by touching the screen

- When looking at the screen swipe left to advance a slide
- Swipe right to go back
- Use 2 fingers moving outwards to select an area to zoom in on
- Go back to normal by using 2 fingers and moving inwards
- Go further in and see your whole slide desk

**Touch and hold when in PowerPoint to get some further options, e.g. Ink detailed below**

### Add interaction to your PowerPoint by drawing on slides using Windows Ink

<https://support.office.com/en-us/article/Draw-and-write-with-ink-in-Office-6D76C674-7F4B-414D-B67F-B3FFEF6CCF53>

**Further information will be added to this page as we get to know the screens and in collaboration with our Learning and Teaching and Technology Enablement colleagues.**
